

# The Modern Eye Exam

Modern Eyes at Alafaya is committed to providing the most technologically advanced eye care possible. As a part of this commitment we are offering you the Centervue Digital Retinography System (drs), the Zeiss Optical Coherence Technology (OCT), the Zeiss Corneal Topographer, and Zeiss Humphrey Visual Field Analyzer(HVF). These instruments digitally capture eye health. **Gathering data from these tests often do not require eye drops!**

These advanced high resolution digital images allow the doctor to gain a better understanding of any condition that may be present inside your eyes or body. This procedure promotes the early detection of abnormal eye conditions such as:

- **GLAUCOMA**
- **RETINAL DETACHMENTS**
- **DIABETIC RETINOPATHY**
- **BRAIN TUMORS**

Doctors strongly recommends these quick and accurate digital images for all patients yearly, especially those who have any of the following:

- **Headaches or eye pain**
- **Flashes of light or floaters**
- **Family or personal history of diabetes**
- **History of high blood pressure**
- **Heart problems and/or circulatory problems**
- **Medications (plaquinel, prednisone, etc.)**
- **High eyeglass prescription**
- **Recently reduced vision**
- **Anemia**
- **History of eye injury/trauma**

There is a fee of **\$50** for all advanced digital examinations. With a receipt, your insurance plan may reimburse you for these medical procedures. Modern Eyes at Alafaya does not guarantee reimbursement. Check with your insurance company regarding coverage.

I have read and understand the information regarding the Modern Eye Exam offering.

Check the appropriate line below, sign and date.

**YES**, I want the Modern Eye Exam.

I would like to discuss this further with the doctor.
